

Green Heat

Heat Pump Rebate Application

In **electrically heated homes** you can apply for rebates within 90 days of purchase and installation of qualifying heat pump products.

In **non-electrically heated homes**, beginning July 10, 2018 you can apply for rebates for the products listed below within 90 days of purchase and installation of qualifying heat pump products. Purchases and installations in non-electrically heated homes prior to July 10, 2018 are not eligible for rebates as rebates are not retroactive before July 10, 2018.

- Central Ducted Heat Pump
- Air to Water Heat Pump
- Geothermal Heat Pump

Mini-Split Heat Pumps continue to be available to all homes within 90 days of purchase and installation.

Homeowner Information

Please note: Homes must be an existing (at least six months past the occupancy permit) single family home used year round.

Installer Information

Installer Name:
Contractor/Company Name:
Installation Certification Number (WETT, RACM, or CGC):
Installer Email:

Tell us about your home heating system:

What was your primary heating source prior to your recent installation?				
<input type="checkbox"/> Electric <input type="checkbox"/> Oil <input type="checkbox"/> Wood/Pellets <input type="checkbox"/> Natural Gas/Propane <input type="checkbox"/> Other (specify):				
What space heating equipment did you use with this source?				
Resistance	Forced Air Furnace	Boiler	Heat Pump	
<input type="checkbox"/> Radiant Baseboards	<input type="checkbox"/> Forced Air Furnace (Central Ducting)	<input type="checkbox"/> In-Floor	<input type="checkbox"/> Central Ducted	
<input type="checkbox"/> ETS Central			<input type="checkbox"/> Geothermal	
<input type="checkbox"/> ETS Room Units # of units_____	<input type="checkbox"/> Forced Air Furnace (Single Ducting)	<input type="checkbox"/> Radiators or Hot Water Baseboards	<input type="checkbox"/> Air-to-Water	
What was your secondary heating source?				
<input type="checkbox"/> None <input type="checkbox"/> Electric <input type="checkbox"/> Oil <input type="checkbox"/> Wood/Pellets <input type="checkbox"/> Natural Gas/Propane <input type="checkbox"/> Other (specify):				
What space heating equipment did you use with this source?				
Resistance	Forced Air Furnace	Boiler	Stove or Fireplace	Heat Pump
<input type="checkbox"/> Radiant Baseboards	<input type="checkbox"/> Forced Air Furnace (Central Ducting)	<input type="checkbox"/> In-Floor	<input type="checkbox"/> Stove	<input type="checkbox"/> Central Ducted
<input type="checkbox"/> ETS Central				<input type="checkbox"/> Geothermal
<input type="checkbox"/> ETS Room Units # of units_____	<input type="checkbox"/> Forced Air Furnace (Single Ducting)	<input type="checkbox"/> Radiators or Hot Water Baseboards	<input type="checkbox"/> Fireplace	<input type="checkbox"/> Ductless Mini Split # of units_____ <input type="checkbox"/> Air-to-Water
Optional: Please list any additional heating system and/or notes relevant to your above heating system:				
What specific air conditioning equipment did you use?				
<input type="checkbox"/> Air Source Heat Pump <input type="checkbox"/> Central A/C <input type="checkbox"/> Room A/C _____ # of units <input type="checkbox"/> None				
How did you heat your domestic hot water?				
<input type="checkbox"/> Electric <input type="checkbox"/> Oil <input type="checkbox"/> Wood/Pellets <input type="checkbox"/> Natural Gas/Propane <input type="checkbox"/> Other (specify):				
What type of equipment did you use to heat your domestic hot water?				
<input type="checkbox"/> Storage Tank <input type="checkbox"/> Indirect/Tankless Coil <input type="checkbox"/> Instantaneous <input type="checkbox"/> Heat Pump Water Heater <input type="checkbox"/> Other (specify):				

Tell us what you installed:

New Heat Pump Equipment Information	
Heat pump type	
<input type="checkbox"/> Ductless Mini Split <input type="checkbox"/> Centrally Ducted <input type="checkbox"/> Air-to-Water <input type="checkbox"/> Ground Source	AHRI Certification #: _____ (Ducted Heat Pumps Only)
Date Installed:	Installed Cost (Incl HST):
Manufacturer/Brand:	Outdoor Model Number(s):
Indoor Model Number(s):	
Did this replace an existing heat pump?	
<input type="checkbox"/> Yes <input type="checkbox"/> No	
Was this old system functional at time of replacement?	
<input type="checkbox"/> Yes <input type="checkbox"/> No	

Please note: rebates are not available for the replacement of working equipment. If replacing non-working equipment please contact us prior making your purchase and we can confirm eligibility and rebates.

Send in your application package

Your completed application package must include:

- completed and signed rebate application
- an official detailed invoice (if you need any assistance see **invoice guidelines**)
- photos of the installed system (indoor and outdoor components)
- a copy of a recent electric bill; and
- if replacing an existing heat pump, please provide a letter from your contractor stating service call date, condition of current equipment and if existing equipment can continue to be used.

Enjoy the good things
efficiency brings.

Participation in the Home Energy Assessment program or New Home Construction program precludes homeowners from receiving rebates for the same upgrades in other Efficiency Nova Scotia programs. Only rebates from one program will be issued for any particular measure.

Heat Pump Equipment Rebate Guide

Equipment Information and Eligibility Criteria							
System Type	Incentive	Equipment Eligibility Criteria					Installation Requirements
		Eligibility Requirements	HSPF Region 4 (HSPF Region 5)	SEER	EER	COP	
Ductless Mini-Split Heat Pump	\$ 200/ton	Please Refer to Cold Climate Heat Pump List					Must be installed by certified Refrigeration and Air Conditioning Mechanic (RACM)
Centrally Ducted Heat Pump	\$ 400/ton	ENERGY STAR® V5.0 or Newer	≥8.5 (7.4 or greater)	≥15.0	≥12.5	N/A	Must be installed by certified Refrigeration and Air Conditioning Mechanic (RACM)
Air-to-Water Heat Pump	\$ 400/ton	CSAC656-05 or ANSI/AHRI210/240-1994 or equivalent	≥8.5 (7.4 or greater)	≥15.0	≥12.5	N/A	Must be installed by certified Refrigeration and Air Conditioning Mechanic (RACM)
Geothermal Heat Pump	\$ 500/ton	ENERGY STAR® V3.0 or Newer	N/A	≥16.0	≥15.0	3.1	Must be installed by Canadian Geo Exchange Coalition (CGC) Certified Installer

DEFINITIONS:
 1 Refrigeration ton = 12000 Btu
 HSPF: Heating Seasonal Performance Factor
 SEER: Seasonal Energy Efficiency Ratio
 EER: Energy Efficiency Ratio
 COP: Coefficient of Performance

Please Note: Nova Scotia is located in climate region 5, however most manufacturers produce system specification for climate Region 4 (U.S.).

Rebates are not available for the replacement of working equipment. If replacing non-working equipment please contact us prior making your purchase and we can confirm eligibility and rebates.

Electrically Heated	Non-Electrically Heated
100% electric heat (no non-electric space heating systems in the home). This include homes that only have electric baseboards, electric furnace, electric boiler, central heat pump with electric backup or any of these electric systems along with solar, ETS, and/or ductless mini-splits.	100% non-electric heat (no electric space heating systems in the home). This includes homes with only a non-electric heating system (e.g. central furnace or boiler that supplies heat to the home using oil, natural gas, propane, wood or pellets).
Home is set up to primarily use electric heating (any of the systems above), but also has one or more non-electric space heaters. A non-electric space heater could be considered a wood / pellet stove, oil stove or space heater, gas fireplace or space heater, coal stove.	Home is set up to primarily use non-electric heating (any of the central systems above), but also has one or more electric space heaters. An electric space heater could be considered electric baseboards (e.g. in an addition on the home), electric in floor heating (e.g. in the bathroom) or other electric resistance heating that is not supplied to the majority of the home.
Home has a central heat pump - regardless of back up.	Home has any type of central non-electric heating and ductless mini-split(s).
