

## Electric Thermal Storage (ETS) System Rebate Guide

Equipment Information and Eligibility Criteria				
System Type	Incentive	Equipment Eligibility Criteria*		
		Storage Power (kW)	Storage Energy (kWh)	Coincident Demand Savings (kW - 8h charge)
Ecombi ECO158 (room unit)	\$198 /System	1.0	7.9	0.5
Ecombi ECO208 (room unit)	\$263 /System	1.3	10.5	0.7
Ecombi ECO308 (room unit)	\$393 /System	2.0	15.7	1.0
Ecombi ECO408 (room unit)	\$525 /System	2.6	21.0	1.3
Steffes 2102 Plug-in (room unit)	\$338 /System	1.3	13.5	0.8
Steffes 2102 (room unit)	\$338 /System	3.0	13.5	0.8
Steffes 2103 (room unit)	\$506 /System	4.5	20.3	1.3
Steffes 2104 (room unit)	\$675 /System	6.0	27.0	1.7
Steffes 2105 (room unit)	\$844 /System	7.5	33.8	2.1
Steffes 2106 (room unit)	\$1,000/System	9.0	40.0	2.5
Unlisted model (room unit) - prescriptive**	\$25 /kWh**	N/A	N/A	N/A
Central system (prescriptive)***	\$2,000 /System***	N/A	N/A	5.0
Residential domestic hot water timer (bundle with central/room ETS)****	\$20	N/A	N/A	N/A

\* ETS systems must be replacing or supplementing electric resistance heating

\*\* \$25 per kWh, lesser of the total storage or the 8-hr storage capacity (multiplied by 8)

\*\*\* central ETS systems provide a single incentive of \$2,000

\*\*\*\* residential domestic hot water timers are available to be added to any standard electric hot water heater where the homeowner is on, or switching to, the Residential Time of Day electricity rate through Nova Scotia Power

Electrically Heated	Non-Electrically Heated
100% electric heat (no non-electric space heating systems in the home). This include homes that only have electric baseboards, electric furnace, electric boiler, central heat pump with electric backup or any of these electric systems along with solar, ETS, and/or ductless mini-splits.	100% non-electric heat (no electric space heating systems in the home). This includes homes with only a non-electric heating system (e.g. central furnace or boiler that supplies heat to the home using oil, natural gas, propane, wood or pellets).
Home is set up to primarily use electric heating (any of the systems above), but also has one or more non-electric space heaters.  A non-electric space heater could be considered a wood / pellet stove, oil stove or space heater, gas fireplace or space heater, coal stove.	Home is set up to primarily use non-electric heating (any of the central systems above), but also has one or more electric space heaters.  An electric space heater could be considered electric baseboards (e.g. in an addition on the home), electric in floor heating (e.g. in the bathroom) or other electric resistance heating that is not supplied to the majority of the home.
Home has a central heat pump - regardless of back up.	Home has any type of central non-electric heating and ductless mini-split(s).
