Ville de Saint-Bruno-de-Montarville**

Progress in action!

**TO THE RESIDENTS OF LAURE-GAUDREAU STREET
(between Carmel and Marie-Rollet streets)**

Subject: Reconstruction of infrastructures

Dear resident,

In the current context of the COVID-19 pandemic, the Québec government announced on April 28 that it was authorizing, as of May 11, 2020, the restarting of activities in all sectors of the construction industry. The Ville de Saint-Bruno-de-Montarville is pleased to be actively participating in this reopening of the Québec economy. Accordingly, and to not fall behind in its infrastructure improvement program, the town will move ahead on the various public works planned for 2020.

As a result, and as previously announced in our first letter sent last march 5, the town's engineering department will undertake in the week of August 3, 2020, reconstruction of the infrastructures on Laure-Gaudreault Street, between Carmel and Marie-Rollet. Some minor preparatory work for the various infrastructures to be rebuilt will be carried out in the week of July 27, 2020. Excavation Civilpro Inc. is the contractor hired for the work. The work should be finished by September 28, 2020. Note that the contractor's final schedule may be slightly modified in the coming weeks, in which case you will be notified.

In order to ensure the health, safety and well-being of the workers and residents, the town is committed to following all the directives and recommendations (as they evolve) of the Québec government and the measures established by the Commission des normes, de l'équité, de la santé et de la sécurité du travail (CNESST) for this work.

Description of the work

- Video recording of area by the contractor (recording the existing conditions before the work);
- Putting in a temporary water main network on private property;
- Complete reconstruction and geometric reconfiguration of the roadway;
- Reconstruction of water main and septic sewer and storm sewer mains, including replacing service connections within the municipal right of way;
- Reconstruction of curbs and/or sidewalks;
- Addition of bike paths (creating cycling link as foreseen in the town's master plan);
- Reconstruction and construction of concrete foundations at bus stops;
- Paving the street;
- Street markings and traffic signs;
- Restoration of area.

Local Access

The work will cause the closure of Laure-Gaudreault Street, between Carmel and Marie-Rollet. Arrangements will be made to limit the inconvenience for residents:

- Only local traffic will be allowed on Laure-Gaudreault Street;
- Drivers can park on neighbouring streets;
- Direct access to your property may be hindered for a few days during excavation and concrete work operations;
- No trucks or machinery for landscaping and renovation, etc., will be allowed to park on the street. In addition, no material will be allowed to be stored on the street;
- The contractor will be responsible for household garbage, organic waste and recycling collection when the street is closed in front of a property. However, to facilitate collection, please:
 - Identify your blue recycling bin and brown compost bin with your street number using a black marker;
 - Place your garbage (garbage pails only) in garbage bags.

It is important to note that the collection days indicated on the town calendar will stay the same during the work, but the collection times may change. You should, therefore, put your bags and bins out by the street on the evening before the collection day shown on the calendar.

Notice to Residents

To better serve you, we request the following information:

- Identification and location of automatic watering systems;
- As specified in our letter of last April, the construction of new curbs and sidewalks in front of each driveway entrance will be built according to the municipal by-law.

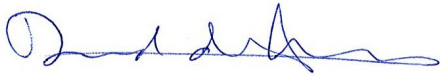

If you have any doubts as to the compliance of your driveway entrance, immediately contact the permits department at 450 645-2930, otherwise it will be rebuilt in the same place with the same width.

Mail Delivery

When the heavy machinery arrives on your street, Canada Post will stop mail delivery and you will have to go to the post office at 50 Chemin De La Rabastalière Ouest to pick up your mail. To speak to a Canada Post representative, call 450 441-1583.

For more information, please contact Lyne Rouillard at 450 645-2920 or by email at contrat.genie@stbruno.ca. You will also find information in the Info-Travaux section of our website at www.stbruno.qc.ca.

Well aware of the inconvenience this work may cause, we thank you for your cooperation.

David Deandrade, Eng.
Division Head
Engineering Department
