

NOTICE OF COMMENCEMENT OF ENVIRONMENTAL ASSESSMENT

Downtown Brampton Flood Protection Project Toronto and Region Conservation Authority (TRCA) and the City of Brampton

The City of Brampton's Downtown Core is subject to flooding during a regulatory (Hurricane Hazel) storm event and is therefore subject to land use development restrictions under a Special Policy Area Designation (SPA3). The City of Brampton and TRCA are considering alternative ways to protect Downtown Brampton from future flood events and unlock potential for revitalization of the Downtown Core by commencing the Downtown Brampton Flood Protection Project Environmental Assessment (DBFP EA). The objective of the DBFP EA is to identify a preferred alternative for providing flood protection for the City of Brampton's Downtown core while considering urban design and land use opportunities for the City of Brampton.

In accordance with the requirements for Schedule C projects of the Municipal Class Environmental Assessment, TRCA and the City of Brampton will commence Phase 1 through 4 of the Municipal Class EA Process.
