

# Pomona Creek Royal Orchard Park North Sanitary Infrastructure Protection Project Site P-080 (YOR-011)

Site P-080 is located north of Royal Orchard Boulevard within Royal Orchard Park, in the City of Markham (**Figure 1**). Detailed designs for a “repair-in-place” sanitary infrastructure protection solution have been prepared and include the removal of a pre-existing gabion basket, followed by the construction of a vegetated rock buttress and installation of native tree and shrub plantings.

Construction at Site P-080 is tentatively scheduled to commence early winter 2019, pending receipt of all permits and approvals. For more information, please refer to the [Pomona Creek Royal Orchard Park North Sanitary Infrastructure Protection Project website](#).
