

# German Mills Creek Sanitary Infrastructure Protection Project Site P-531 (YOR-004)

Emergency works at Site P-531, located within German Mills Settlers Park (**Figure 1**), were completed in the summer 2017. Remedial works included the construction of a vegetated stone revetment at the base of the slope and the installation of an upper bank slope stabilization treatment to provide protection to the exposed sanitary maintenance hole owned by York Region (**Figure 2**).
